

Website building

Based on tutorials at:

<http://tutorials.codebar.io/>

Using a basic text editor and a browser

Website building

Session Goals:

1 – Title

2 – Header

3 – Some written content

4 – Image

5 – Link

6 – **bonus some styling (CSS)**

7 – **bonus alert / message button (JS)**

Webpage Layout

```
<!DOCTYPE html>
```

```
<html>
```

```
  <head>
```

```
  </head>
```

```
  <body>
```

```
  </body>
```

```
</html>
```

Save your file

Save your file as:

Name1_Name2.html

Add a Title

```
<!DOCTYPE html>
```

```
<html>
```

```
  <head>
```

```
    <title>My favourite thing!</title>
```

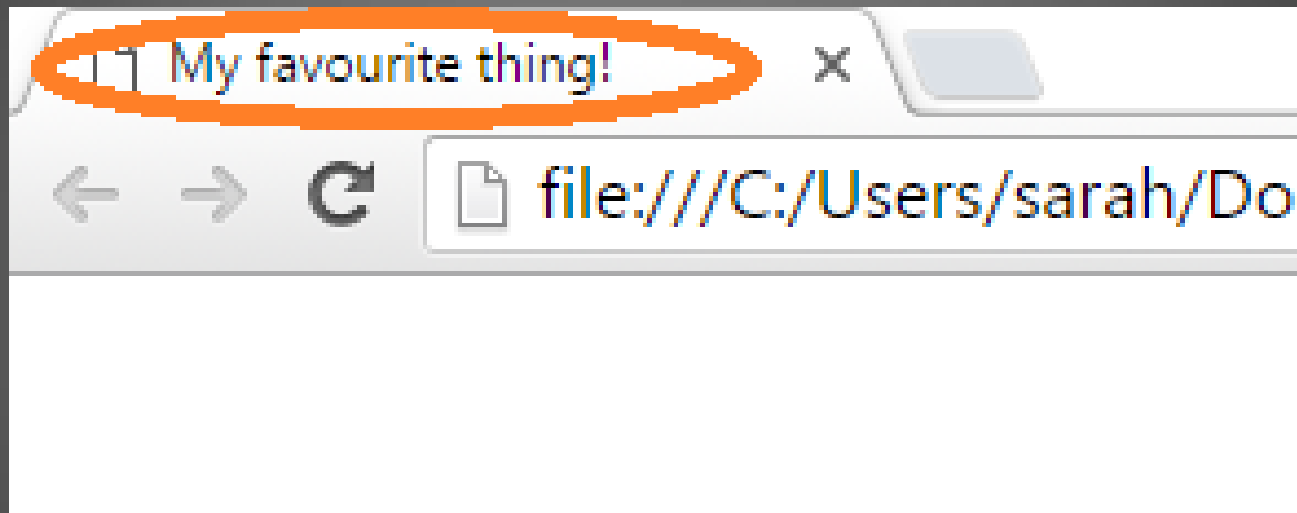

```
  </head>
```

```
  <body>
```

```
  </body>
```

```
</html>
```

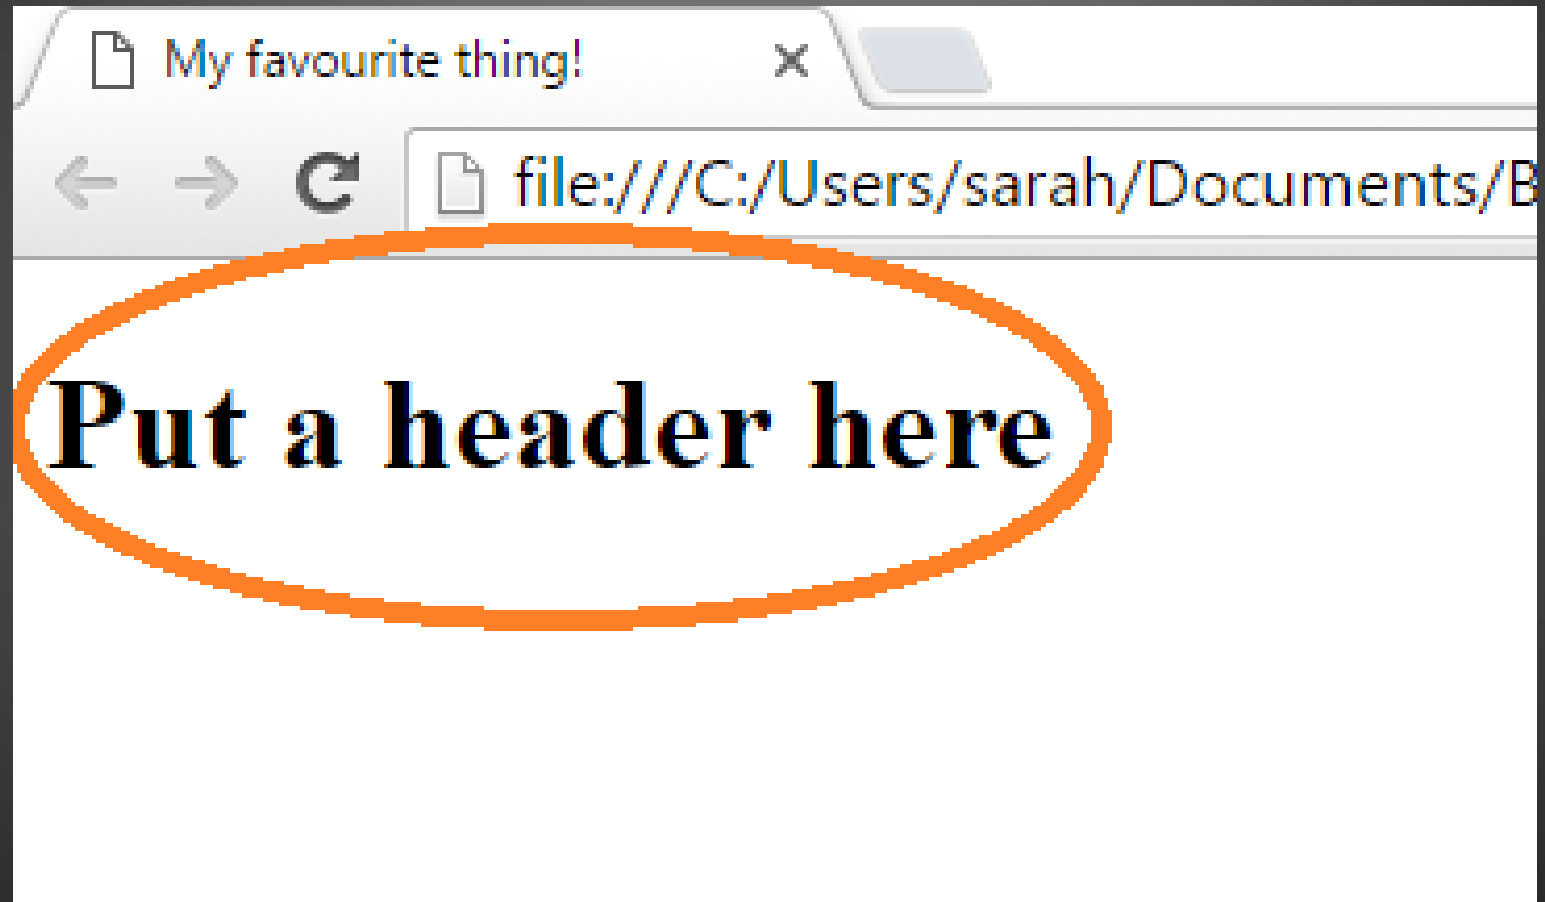

Add a Title

Add a Header

```
<!DOCTYPE html>
<html>
  <head>
    <title>My favourite thing!</title>
  </head>
  <body>
    <div>
      <h1>Put a header here</h1>
    </div>
  </body>
</html>
```

Add a Header

Add Text Content

```
<body>
```

```
  <div>
```

```
    <h1>Put a header here</h1>
```

```
    <p> Some content for you <br>
```

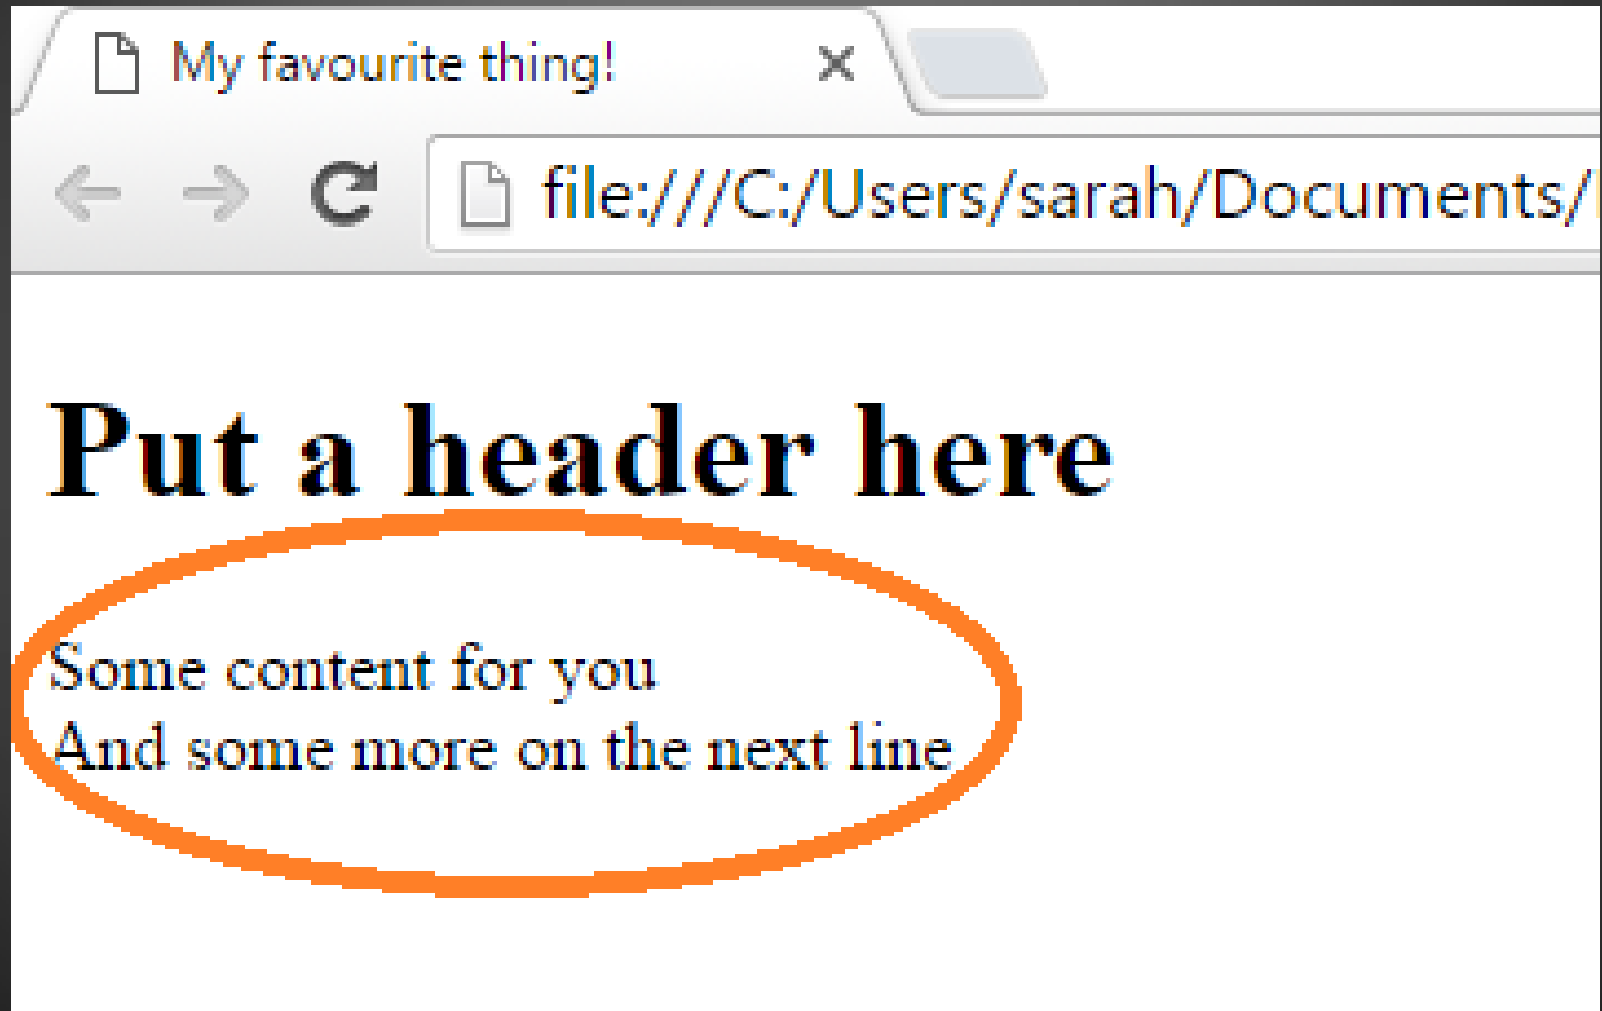

```
      And some more on the next line
```

```
    </p>
```

```
  </div>
```

```
</body>
```

Add Text Content

Find an image here

<https://unsplash.com/>

Add an Image

Put a header here

Some content for you
And some more on the next line

Add a link

```
<body>
```

```
  <div>
```

```
    ...
```

```
  </div>
```

```
  <div>
```

```
    <a href="http://www.google.com">
```

```
      Click this link! </a>
```

```
  </div>
```

```
</body>
```

Add a link

**bonus* CSS*

```
<!DOCTYPE html>
```

```
<style>
```

```
  p {
```

```
    color: hotpink;  
    text-align: center;
```

```
  }
```

```
  h1 {
```

```
    color: purple;
```

```
  }
```

```
</style>
```

```
<html>
```

```
  ...
```

```
</html>
```

**bonus* CSS*

My favourite thing!

x

file:///C:/Users/sarah/Documents/Black%20Girls%20Code/Website%20building/6.html

Put a header here

Some content for you
And some more on the next line

black girls  **CODE**
imagine. build. create.

```
<style>
```

```
...
```

```
</style>
```

```
<script type="text/javascript">
```

```
  alert('Hello! Welcome to my website!');
```

```
</script>
```

```
<html>
```

```
...
```

```
</html>
```

**bonus* JavaScript*

This page says:

Hello! Welcome to my website!

OK
